

THIS IS THE MOST FOR REAL MONEY MAKER YOU HAVE
EVER SEEN ANYWHERE OR ANY TIME...

How can I say that? Just wait till you get a bit deeper into this book, I'll bet you that you will realize this is one of the best moments of your life.

Your Financial Life

Let's begin shall we?

First thing right off the bat, you have never had a book in your hot little hands like this before and what you can achieve with what is in this book is nearly limitless in terms of finances.

I'm talking about money and how much you can make now that you have this information and these resources.

Pretty pictures, none. Table of contents, nope.

Stories about how wonderful the author is? No again. Fancy stuff? Large fonts? Extra fillers? No, no and no again.

I will include helpful "stuff" that will help me paint a picture of what I want to get you to know but other than my own weirdness, there won't be any fluff here.

I want this to be the best book you have ever read in your life, for making money.

Because if it is, then my job of getting you to take the next steps that I outline in this book will be easy.

And you will make money like you have only dreamed of. Like I do. And hundreds of thousands of other people are, right now.

So What is here?

A very concise, to the point, step by step description of how you can create an income that is monstrous.

First I will let you know that what ever cynicism, disbelief, or negativity you have absolutely will affect your outcome.

So put a lid on the negative stuff and realize that sometimes, some people catch a break and a rich uncle dies and leaves them a fortune, or a scratch lottery ticket pays out big or you were just so in the exact right place at the exact right time that something incredible happens to you.

Here Is How You Screw Up Or Move Up

Just stay with me here for a minute and attempt to focus and think the very best that you can.

Typically people are so incapable of being able to actually think, it is amazing that everyone is not stumbling right into moving traffic!

So, breathe, think and give yourself permission to spend this time for you, on you and in making you better.

You will either decide to do so or you will blow past my advice and not slow down and pay attention and engage your brain.

And if you do not plug in and be a part of your own success story right now, then nothing good is going to happen for you.

But we want something very, very good to happen don't we?

Yes.

So consider this bit of genius:

What you think, determines your actions, meaning what you do. And what you do, determines your results.

Are you feeling me?

If you think you are never going to be rich from the internet, you can darn sure believe that your thinking will guide your actions and if you are not doing the successful things that it takes to be successful, then you will not be.

So let's right now believe something together. You my friend are wonderfully and powerfully made. The top Apex predator.

Screw up or move up continued...

And right now you are going to learn how to experience a line out of an old Fabulous Thunderbirds song...

"Now, when I walk the streets Kings and Queens step aside
Every woman I meet, haha They all stay satisfied.
I wana tell ya pretty baby, what I see I make my own
And I'm here to tell ya honey That I'm bad to the bone"

Your thinking must be that you can and will now do what it takes to become so wealthy that people are going to look at you differently.

There is no more of the same old same old!

Ready for more Genius info?

Good. Consider this, I am about to share a very simple roadmap and set of instructions that you can follow to make yourself a fortune.

And we're going to do it, and I know you can do it because you have the same internet as I do.

And the same one that Bill Gates, Elon Musk, Jeff Bezos and lot's of other uber rich people have.

You have the same internet. And that means that you can reach as many people to show your stuff to as Jeff Bezos does with his little company, Amazon.

You know he started out as an online book seller, right?

Screw up or move up continued...

And now let me show you something you did not know, which is what to do with the most powerful communications device in the history of mankind so that you make so much money that you might go a little nutty for a while.

Here's the Success Formula That Does Everything

Since the internet dream is true...

That there are like a zillion people on the internet and if you can show them something they want bad enough, a ton of them will buy it if your offer is any good, and a half a ton of them will buy it even if your offer is not so good.

So first, find a significantly large group of people that has a significantly large problem, want, need or desire...

And they have the money to pay someone to fix their problem or provide the solution...

And then you get what they want to solve that need or want or desire and tell them that you will give it to them in a way that makes them want to get it from you.

In other words, make them an offer that they grab onto for dear life and insist that you take their money in order for you to be the one that delivers the "Thing" to them.

And with that you are almost done.

Think now. A whole bunch of people that really want something bad and they have the money to get it, and you show up with it wrapped in an offer that they cannot refuse.

You just got the sale.

You just sold something and got money.

Now do it over and over and over and you will have more money.

Continued... Success Formula That Does Everything

Keep doing it and suddenly it's going to get real, real around here.

So What Do They Want?

They want everything. All the time, they want everything all the time and they buy stuff all the time.

What do they buy? They buy houses, shoes, food, bicycles, hammers, roller skates, books, sunglasses, furniture for their living rooms.

On and on and on. We all buy stuff, all kinds of stuff, all the time.

Let's just make sure it is you that has the stuff that they want to buy and we'll make them an offer so they want it from you.

Who Are These People?

They are you and I. They are us. You know... people. People everywhere, all of us and there are a heck of a lot of us.

And we all want stuff. All the time. And often we buy this stuff that we want so much.

Let's just pick some of these things and let all these wonderful people buy them from... you. And me. And us.

Here's your first "Trick"

When you are thinking about who to sell things too, just consider how badly they want the things they want because the more they want "it" the easier it will be for you to "sell" it to them.

Here's an example. A brand new mom with a beautiful little baby girl, or... boy.

And this mom, here hormones are sky high, her heart is filled to the brim and her desire to get the most beautiful baby items for her new little precious is off the charts!

So here you come, with the perfect designer stroller that has a sunshade, a padded little bucket for baby to ride comfortably in and it's built to last and provide great value for the family and baby.

And you have it at a great price! And it comes with a catalog of the finest baby getting stuff on this planet and when they get this Rolls Royce of strollers from you they'll get an extra bonus!

And that bonus is... well it's what ever you decided would make your offer so awesome that they surely could not pass it up.

And you just made a sale.

Here's your second "Trick"

What if you have built into your offer a continuity plan? Meaning that you charged over and over, like monthly or on some kind of schedule, so that you kept providing great service that they would enjoy or need, with out them ever having to do without it?

Want to know the answer? It's easy, the answer is you keep collecting money, that's the answer.

And you just made another sale.

For example, I just bought meat online. Butcher Box. Very high quality meat, packaged very well, very frozen, that I got to pick out off an online menu and they shipped it to me.

Delicious. And it comes every month!

And they just got another sale. And another, and another and on it goes.

But what if you don't want to sell frozen meat?

Then don't.

Remember there are a lot of people buying a lot of things, sell what you want.

Personally, I like selling something that makes a good profit, is a good value for my customer, that they like having, and they like me for getting it for them.

Ok, Trick Number #3

Figuring out what to sell.

You can go to www.YouTube.com and type in random things and see how many people are watching that thing.

Bass fishing, hair loss products, computers, cell phones, Acrylic Paints, puppies...

And when you find something that a ton of people are interested in, try to figure out how you can deliver something about it in a way that makes them want to purchase it from you.

An example may be, barking dogs.. perhaps you could spend about 3 hours and create a great info product on how to stop dogs from barking.

Or what about weight loss? You could do a "10 ways to lose weight before the weekend" and offer it for sale or as a lead in for a weight loss product that you have found online.

The "Trick" is.. information is easy to create, and excellent information that is a benefit will actually be an awesome thing for your new customers and it's very easy for you to create and you only have to create it one time, then just copy it over and over!

Reports, Manifesto's, eBooks, they are all just documents you can easily create and give as an introduction to other products or sell as a stand alone product, or even as a part of a series of products.

Info Products & Affiliate Products

The list of things you can create info products on or lead in products to introduce yourself to a new group of buying people is endless.

And remember the more passionate the people are, the easier it is to get them to buy something of great value from you it will be.

Think... Lonely.

Now think, how to win friends and influence people. That book sold...

Over thirty million copies.

And if they bought that book from you, and loved it, I'm betting the next great book you offered would go like hot cakes!

The list of people you have interested in your offerings are known as your list.

The internet people will tell you that, the money is in the list.

I've always changed that to, the money you get is in *your* list.

Meaning you can find a list of people that will be meaningless to you unless they are interested in your offers.

Making the Perfect Offer

Let's see what we have covered so far, OK? We now know we have the internet, can reach the World, the world is constantly buying all sorts of things...

We know that if there is a group of people who are passionate about getting a solution or results that it is easier to sell to them and if we make a great offer and deliver the best value of their life that they will love buying from us.

We know that if the product is something that we can provide info about, that we can create an introduction product and or a sellable product.

We know that if the product needs to be continuously delivered that means we continually get paid over and over to deliver it...

And we know that if we can craft a great offer at the right time to the people who really want what we offer that we are probably going to start selling rather significant amounts.

Let's Put It All Together Now...

The internet is reaching millions of people right now who are buying stuff. We can find out what they want and create info products out of thin air that are of actual benefit and value and we can sell them and feel great about helping others get what they really want.

Think instruction on weight loss, growing hair, putting together a swing set, taking a stroke off of a golf game, getting your girl friend back, making your car headlights clear again, improving your complexion...

See? The products you can make and sell are endless.

And so is the money you can make.

The Perfect System

The perfect system. A webpage with your "Thing" on it and a form to collect contact information from interested people and a buy me button so your visitors can enter their credit card.

Then a "Thank you" page to deliver the product, if it is an electronic download thing like an info product.

And some of these products going out as a "drip" into a membership where people happily pay monthly to keep getting stuff online or shipped to them, like the meat boxes I mentioned earlier.

So there are a ton of tools and you can spend the rest of your life getting them and getting better and better using them.

Or not.

Examples are, videos, auto-responders, customer service, graphic creation, customer service software, widgets of all shapes and sizes...

Or you can just, get an existing system...

One already created, working, growing and successful.

And you just plug in and do your thing, typically that means finding customers.

Which is the easiest part of this whole process.

One way to do it really big time and again think, Amazon.

Is to get affiliates, which means you find other people who want to sell your "thing" to people and get to keep part of the money it makes.

This is the part that you want already done

Meaning if you do not want to learn a new career or spend a great deal of time, learning before you can make money...

Then find a product or service that is in high demand and you become an affiliate or sales person and get some of the money when you sell it.

And if it is a membership or an affiliate program you can simply plug in to someone else's hard work and just start running full steam ahead right out of the gate.

The Big Review

You need a big group of people that want something passionately that you can create an introductory info product and or a final product to fulfill what they want.

You want to put it on a webpage and collect email addresses or phone numbers or something so you can keep making them great offers to buy the something from you.

And you need to either sell a whole lot of them one at a time, or get people/affiliates to want to sell and split the profits with you so that they are doing all their work and you are getting paid just because.

Nice.

And you need to create offers that make all these people want to buy the things they want to buy, from you!

And...

You want to maintain a list of people who are interested who have not bought yet and a list of people who have bought and you can offer them other related products as well as keeping them stocked up with the original thing.

You may need to either learn to use a couple of tools like auto-responders, form creators, website builders, and video editors or you can find something where all that is done and you just sign on to sell it and keep some of the money when you do sell it.

Often better because now it's without any of the cost, time or heartache of creating the system that does everything from...

Continued...The Big Review

finding these people to making them offers to delivering the products to them.

The Missing Link(s)

It really is very easy. Get on the internet. Find a bunch of people that want something. Make them an offer so they get it from you. Sell it to them, find more people to make your offer too and then again rinse and repeat.

So if it's so easy, why are most people so broke?

I will first crush your dreams and then show you how the sun is breaking thru the clouds on the most glorious day of your life, OK?

This is all very easy, or is it? Ok so can you tie your shoelaces?

Is it hard? When you first started it was one of the hardest things you had ever done.

First time driving a car...

Swimming...

Dancing...

Threading a needle...

Reading, cooking, fixing something.

Super easy... now - but not the first few times.

Plus your shoe laces don't keep changing into things you have no idea about.

Like creating coding on a webpage or using a graphics creator or uploading a file to your CPanel on your server...

And how do you find all these people that buy things?

And what happens when they say, "No"?

And a membership site? Who can do that? And an affiliate program, how do we set that up?

Suddenly this is about as easy as building a helicopter engine.

Help!

It takes money to make money, right?

Do you remember the part about “Finding” a system that is already done? That way you don’t have to learn how to do all the things that need doing but you don’t want to spend your life learning?

Here is where people fail and how we’re going to fix it.

People want to earn extra money on the internet, it sounds fun.

And it is when you are making money.

But most of us find out that we are spending money on trying to learn how to make money.

What? Wait! You mean we need money, but we have to spend money to learn how to make money?

Uh.. yea, kind of.

So let’s let someone else spend the money, and the time, and make the effort and go thru the process of learning and improving until we find what we want to sell and can reach the people we want to sell too and then deliver the products to all these people over and over in a way that allows us to have profits for our time spent...

Instead of trying to learn to earn and having to spend to make.

This way if we can find a good enough system we can get in relatively cheap, not have a big learning curve and start selling and cashing in on all this internet money we all have heard about.

Help is here and everything is going to be ok
